

## Xilinx Automotive Ecosystem Partner Bios

---

**Sébastien Rabou**

Security Division Director

Sébastien Rabou is a Director at Silex Insight, responsible for the engineering and product roadmap in the embedded security division. He has spent the last 14+ years in various chip development and leadership roles with Barco-Silex, and the recent management lead buyout and creation of Silex Insight. Sébastien holds a master's degree in engineering from Politecnico di Torino.

**Russ Christensen**

**Director of Automotive Solutions, Wind River Systems**

Russ Christensen is director of automotive solutions for Wind River Systems. Russ has over 30 years' experience in automotive digital systems and consumer device design and integration, and 40 years in software development strategies. In his 18 year tenure at Wind River, Russ has driven innovation in both hardware and software development projects for automotive IVI and safety critical systems, and leading edge digital video & imaging systems. Russ works with Automotive OEMs and Suppliers in developing and managing software frameworks and multi-vendor solutions for connected systems in the vehicle.

Russ resides in San Diego, California.
